REASON FOR TODAY'S CALL:
 Kitchen sink is leaking! It is in bad condition and we are not able to operate the sink at all.

DESCRIPTION OF WORK PERFORMED:
 The kitchen sink drain was blocked and the drainage was piped incorrectly and leaking from multiple locations. I removed the old drainage and used a long screwdriver to remove a lot of food debris that was stuck roughly 6' past where I cut the drainage. I repiped the ABS drainage and tested by filling and draining both sides of the sink multiple times. The sink is draining well and there are no sign of further leaking.

TECHNICIAN RECOMMENDATIONS:
 During testing I noticed the garburator grinding chamber has deteriorated to the point that chunks of metal are flaking off. The garburator will have to be replaced. I recommended not using the garburator for the time being.
